Re: Letter of Recommendation for ZEM Life Device Co.

Dear Steve:

It is with great enthusiasm that Grant Engine extends our support and recommendation for ZEM Life Device Co. and their groundbreaking ZEM Life product. As a company at the forefront of securing non-dilutive funding for life sciences companies, we have had the privilege of working with some of the most innovative firms in the industry, and ZEM Life Device Co. stands out as a highlight of innovation and potential.

The ZEM Life product, a sophisticated medicine delivery system, is a testament to the company's commitment to addressing critical healthcare challenges with innovative solutions. The device includes a wrist band, medicine delivery assembly, sensors, control module, and power source, is designed to automatically dispense medication in emergency situations, especially for individuals at risk of opioid overdose. This is particularly crucial in cases involving substances like fentanyl, where rapid intervention can mean the difference between life and death.

What makes the ZEM Life product revolutionary is its ability to function autonomously when the user is incapacitated, ensuring timely administration of life-saving medication. The absence of similar devices in interstate commerce highlights the unique value proposition of the ZEM Life product. Moreover, the potential for Breakthrough Device Designation from the FDA further underscores its significance and the unmet need it addresses.

As experts in securing funding and supporting the development of medical innovations, we recognize the immense potential of ZEM Life Device Co. both in terms of its technological innovation and its capacity to save lives. The company's dedication to rigorous product development, aligned with a clear understanding of regulatory pathways, positions it exceptionally well for success.

We believe that ZEM Life Device Co. presents a compelling investment opportunity. Their innovative approach, combined with a clear vision for addressing a critical healthcare need, sets them apart in a crowded field. The ZEM Life product is not just a technological achievement; it is a product of hope for those vulnerable to opioid-related emergencies.

Grant Engine recommends ZEM Life Device Co. to investors seeking to support a company with the potential to make a significant impact on public health and safety. We are hopeful that ZEM Life Device Co. will innovate and lead in the field of medical device development.

Sincerely,
